MINIMALIST

Minimalism is the art of subtraction.
It is an ode to understated elegance.

1

Minimalism is about appreciating sophistication in simplicity. You truly achieve minimalism when you strip a design down to its bare essentials, and gracefully back it up with limited materials, neutral colours and simple elements, to create elegance of the purest form.

Minimalism is not an architecture of self-denial, deprivation, or absence. It is defined not by what is not there, but by the rightness of what is there and the richness of what is experienced.

Minimalism is the conscious amplification of the things we treasure most and the exclusion of anything that hinders our focus on them.

The expression of a minimalist design appears effortlessly simple, however, creating this kind of powerful simplicity needs sophistication and fine taste.

CONTEMPORARY

Being contemporary is a state of mind.
It's all about being in the present and
celebrating the now.

Contemporary style is about being present in the current moment. It does not refer to a specific time period, but is the constant evolution of something, to be in sync with the popular styles of the present day.

Bold patterns and exciting colours with subtle theme-balancing elements can enliven any kitchen. Contemporary kitchens that feel more like living areas than cooking spaces are an absolutely welcoming trend. Give your kitchen a strikingly contemporary transformation by combining contrasting patterns with bright hues. The key is to pick spots where you would want to go bold and keep the rest looking very simple, for a subtle and ultra-contemporary look.

MODERN

Modernism is bold and original.
It is not just a style, it is an attitude
that breaks all barriers.

Modern interior design incorporates a style that is characterized by sleek lines, simplicity, and a strong emphasis on functionality. It often includes spacious layouts, an elegant aesthetic, and a neutral colour scheme with vibrant accents or contrasting elements. It is tailored to suit the needs of modern-day living. While there is no singular definition for what constitutes modern design, present-day kitchens are undoubtedly designed to accommodate current lifestyles.

The use of exquisite PU-front cabinetry with golden handles, profiles, and skirting adds a touch of glamour to your kitchen. The groove detailing throughout your tall cabinetry, creates a sense of cohesion with the rest of the home, lending a modern touch to the space.

Modern designs don't have to involve too much colour or austere. Evoking a sense of simplicity and elegance, and creating visually appealing, uncluttered spaces is the primary purpose of this design style.

A rustic-inspired palette, reflecting a black and white monochromatic look, with natural wood-hued cabinetry and brown-tinted glass, sparks a beautiful and warm ambience to any room it is introduced in, while keeping modern style at the centre of the design.

Super-modern kitchens love the flat, uninterrupted look as much as possible.

What makes a kitchen an ultra-modern space is: A high-contrast color scheme, like a rose gold metallic wall cabinetry standing out against a dark grey stone laminate; an introduction of tall units, base and wall cabinets that complement each other and the use of inset handles that don't protrude.

CLASSIC

A classic is the feeling of familiarity.
It doesn't need to follow trends because
a classic is always ageless, it is FOREVER!

1

A classic is eternal, it never goes out of style. When it comes to design, the classic style embodies elegance, timelessness, and sophistication. Drawing inspiration from traditional and architectural design elements, showcasing symmetrical layouts, ornate detailing, and refined craftsmanship, this style can turn your kitchen into a refreshing, simple and visually-pleasing space.

A classic colour palette is often soft and muted, with shades of cream, beige, grey and pastels, backed by little hints of gold or silver, to add a touch of opulence to the space.

Using materials like reclaimed coffered ceiling, local stone floors, or even picking up a one-of-a-kind vintage island are few of the many ways in which you can give your kitchen a charming and classic, country-inspired look.
